Indigenous Medicine (IM) “Hela wedakam” is a unique heritage of Sri Lanka coming over centuries based on a series of ancient indigenous medical literature handed down from generation to another. In fact, Sri Lanka is proud to claim to be the first country in the world to have established systematic hospitals. Some ancient cities of Sri Lanka; Polonnaruwa, Medirigiriya, Anuradhapura and Mihintale still have the ruins of what many believe to be the first hospitals in the world.

Historically, indigenous physicians enjoyed a noble position in the country’s social hierarchy due to the royal patronage granted to them by ancient kings. From this legacy, it was stemmed a well-known Sri Lankan saying: “be a physician if you could not be the king”.

AYUREX - ISAIM 2018 offers you a valuable opportunity to be a part of leading academics, scientists, researchers, healthcare professionals and renowned Indigenous Physicians who would contribute to bring about a new platform of innovations in the field of Ayurveda & Indigenous Medicine.
